

Practical Nursing GPA Calculation Worksheet

NOTE: Equivalent transfer must be evaluated and on the DARS report prior to application. Note that if an equivalent course is used to fulfill a requirement, the number of credits used to calculate the GPA for the purpose of program admission will be those in the specified HTC pre-nursing courses. For example, if an equivalent three (3) credit nutrition course is used to satisfy the NURS1015 Nutrition Basics course requirement, the GPA will be calculated as if the equivalent course were also worth one (1) credit. This ensures that students are neither helped nor harmed by taking an equivalent course with a different number of credits.

Calculate your grade below by adding up the point totals, then dividing the total by 17.

Course	Credits	Grade	Your Points
BIOL1400 Human Biology	4	Grade A = 16 pts	
		Grade B = 12 pts	
		Grade C = 8 pts	
ENGL1100 Writing & Research OR ENGL1250 Short Form Composition & Reporting	4	Grade A = 16 pts	
		Grade B = 12 pts	
		Grade C = 8 pts	
NURS1015 Nutrition Basics OR HLTH2001 Nutrition & Health OR BIOL1100 Nutrition & Health	1	Grade A = 4 pts	
		Grade B = 3 pts	
		Grade C = 2 pts	
BIOL2125 Anatomy & Physiology I	4	Grade A = 16 pts	
		Grade B = 12 pts	
		Grade C = 8 pts	
BIOL2225 Anatomy & Physiology II	4	Grade A = 16 pts	
		Grade B = 12 pts	
		Grade C = 8 pts	
	17	TOTAL POINTS	
		Divided by 17 = GPA	

Example:

Course	Credits	Grade	Your Points
BIOL1400 Human Biology	4	Grade B = 12 pts	12
ENGL1100 Writing & Research	4	Grade B = 12 pts	12
NURS1015 Nutrition Basics	1	Grade A = 4 pts	4
BIOL2125 Anatomy & Physiology I	4	Grade B = 12 cr	12
BIOL2225 Anatomy & Physiology II	4	Grade A = 16 cr	16
	17	TOTAL POINTS	56
		Divided by 17 = GPA	3.29

Note: You will not be able to calculate your GPA if you have courses in progress at the time of application. Leave that portion of the application blank.
